KNOW MORE

PROJECTS

NTTF
MEDFIX

Developed Medfix, a healthcare service management platform, using Django on AWS. Implemented automated system services and optimized project deployment for seamless user experience. Live at https://www.medfix.today/

Personal / Private
CTCS

The Codelementry Tracking & Control System (CTCS) is a customizable service designed to gather, assess, and transmit real-time data for efficient monitoring and management of vital operations. This system can seamlessly integrate into current setups, offering functionalities for handling digital assets and delivering real-time data analysis to support well-informed decision-making. CTCS serves as a beneficial resource for companies aiming to enhance processes and maintain competitiveness in today's digital landscape.

Personal
Home Lab

I have established a laboratory utilizing open-source tools such as TrueNAS, Proxmox, and Ubuntu within OpenStack and DevStack setups. Additionally, I've constructed a personal server to generate virtual machines for development and testing tasks.

AWARDS

★ **WorldSkill Asia 2023**

I had the honor of participating in the highly-rewarded WorldSkill Asia 2023 event in Abu Dhabi on November 30th, where I exhibited my technical prowess as an IT System and Network Administrator. My performance earned me a Participation Certificate, acknowledging my unwavering dedication to producing exceptional work and keeping up with the latest advancements in the field.

CERTIFICATES

- AWS Academy Introduction to Cloud Semester 1 - 2
- CISCO - CCNA: Introduction to Networks
- CISCO - Switching, Routing, and Wireless Essentials
- CISCO - Enterprise Networking, Security, and Automation
